OCT 26 2006

Dear Commissioner: This is a response to the Supplemental Action mailed on July 26, 2006.

6. (Amended) A tanning apparatus comprising a toilet 20 having a bowl 28 defining a rim 36 and a seat 22 above the rim 36, the toilet 20 comprising ultraviolet ray-generating [means] lamps 26 located so as to [expose the buttocks of a user supported by the seat 22 to ultraviolet rays generated by the ultraviolet ray-generation means 26] project the light downwardly into the toilet bowl, and wherein the lamps area at each side of the seat and an additional lamp is placeable toward the rear of the seat

The bottom of the toilet bowl has a (magnifying) glass (to send back the ultraviolet rays to the tanning area) with this glass we have a reflection of the ultraviolet rays to the area we need tanning.

We can replace the ultraviolet lights with two long lamps (one left and one right) on the toilet bowl, or only with one in the middle of the bowl.

Sincerely,

George Vlahos
